# Press Release

## Global E-Sourcing, Inc. enters into Re-Seller Agreement with SeKON Software GmbH

South Elgin, Illinois, USA, February 20, 2006: Global E-Sourcing, Inc. is proud to announce it has entered into an exclusive agreement with SeKON Software GmbH to re-sell its solutions for machine automation in North America when the software is not bundled with the purchase of a machine.

SeKON, headquartered in Bonn, Germany, has been providing software solutions for the stone industry for the past twenty years.

The software, TOP™ for bridge saws and SeCAM™ for CNC and waterjet equipment provides machine automation solutions for countertop fabricators. The unique advantage of using TOP™ and SeCAM™ is they can be used in conjunction with a multitude of machine brands and integrate through an interface to Global StonePro™, resulting in a complete and seamless business management solution for large fabricators!

Additional modules may also be purchased to digitally photograph each slab, mark imperfections, automatically nest workpieces and store the digital photo of the remnant pieces. The result is a higher yield on slabs and sheets and correspondingly less remnants to deal with logistically, reduced payroll effort in nesting slabs and programming machines, and a reduction in cutting errors.
