Press Release

Global E-Sourcing, Inc. introduces a visualization tool for countertop fabricators and retailers

South Elgin, Illinois, USA, March 13, 2006: Global E-Sourcing, Inc. has added another dimension to its powerful business management software suite of solutions for the countertop industry – Global StonePro™. The latest module is an add-on to its Global StonePro Web™ solution that allows the user to simply choose from a library of kitchen and bath standard layouts, and then pick the countertop material, cabinet finish, backsplash treatment, flooring materials and wall paint to visualize the project's end result!

This tool can be used in conjunction with existing websites as a lead generation tool or by sales people in the showroom, or even in the customer's home, since it may be accessed from anywhere there is an internet connection!

Global StonePro Web™ now provides the following functionality: lead management, visualization, quoting, sales contract, scheduling, inventory management, order management, subcontractor and project management, automated task lists and the ability to attach any file remotely to a project.

Visit us at the Surface Fabrication and Design Expo in Las Vegas at Booth No. 419 on March 17th and 18th, 2006.
