Press Release

Global E-Sourcing, Inc. introduces StonePro Web™

South Elgin, Illinois, USA, October 16, 2005: Global E-Sourcing, Inc. is proud to introduce the latest addition to our suite of solutions for countertop fabricators...Global StonePro Web™. This solution provides on-demand, always-available access through an internet-hosted application, eliminating the need for additional hardware or expanded IT staff. All you need is a connection to the internet and you are ready to start. Software upgrades are provided automatically and free of charge. Since there is no up-front investment required, it's an economical choice!

The application now features the following functionality: lead management, quotes, order management, scheduling, labor pricing, subcontractor management and task management.

Vipul Shah, President, Global E-Sourcing, Inc. stated "This solution is perfect for the smallest to the largest fabricators. It supports activities from wherever you have an internet connection. The monthly subscription is a site license that allows an unlimited number of users. The application supports multiple levels of password-controlled access and up to four levels of store hierarchy, such as: store, district, region and Corporate levels of reporting."

The Global StonePro™ suite is modular...so that functionality may be added as your business grows. It provides the ability to manage all aspects of a fabricator's business from quoting through order processing, shop management and inventory controls.

Visit us at the Stonexpo in Las Vegas at Booth No. 1569 on October 21st through October 23rd, 2005 at the Las Vegas Convention Center.
